### EXPERIENCE

---

#### Nunchi.trade

Protocol Engineer

Remote, India

July '25 - Present

- Architected an on-chain CLOB + AMM matching engine for perpetuals on yield-bearing assets, letting traders hedge funding-rate and borrow-rate exposure on any asset.
- Built the core Solidity stack - orderbook matching, Clearing House settlement, risk engine, and liquidation flow — integrated with Pyth and Stork oracles for price feeds.
- Shipped an AI-native CLI that lets autonomous agents execute liquidation and TP/SL jobs against live positions.
- Designed an on-chain agent marketplace (ERC-8004 / ERC-8183) where agents register for protocol jobs, complete them, and submit proof-of-completion to claim incentives.
- Worked with Quantstamp and Zelic on external audits, secured contracts with Slither and Trail of Bits tooling and authored in-house Claude Code skills for developer workflow.

#### Novastro

Protocol Engineer

Remote, India

Apr '24 - Jun '25

- Developed RWA tokenization platform for real-estate using ERC-3643 with on-chain Compliance, identity registry for token issuance.
- Architected and developed prediction market protocol in Solidity with cross-protocol yield generation via Aave, Stader.
- Developed a comprehensive cross-chain swap SDK and API suite with standardized interfaces, enabling third-party DeFi applications to seamlessly integrate cross-chain functionalities.
- Developed smart contracts and backend to build decentralised exchange Warpgate.pro in Aptos Move compatible with Aptos Coin and Fungible Asset standard.
- Developed token launchpad Hatchy.fun in Solana with rust, built smart contracts with Anchor framework.
- Built a backend analytics system with subgraphs indexing using graph protocol, enabling comprehensive trading metrics, liquidity provider performance tracking, and protocol-wide statistics.

#### Xalts

Lead Blockchain Engineer

Bangalore, India

Dec '23 - Mar '24

- Implemented Account abstraction(ERC4337) for EVM chains like Polygon, Avalanche subnet and Hyperledger Besu.
- Developed in-house infrastructure for Account abstraction with skandha bundlers.
- Managed infrastructure for running nodes of different blockchain networks and bundlers.
- Architected smart contracts for asset tokenization for financial institutions.
- Built in-house indexer for EVM chains with Typescript, GraphQL and MongoDB.

#### Oddz

Blockchain Engineer

Bangalore, India

Jan '21 - Dec '23

- Led smart contract development for Oddz protocol (oddz.fi), an options trading platform with concentrated liquidity (Uniswap V3-style) for capital-efficient risk management, staking, and liquidity provisioning
- Pioneered research on derivative trading in the crypto ecosystem, building a protocol with yield generation mechanisms and enhanced trading capabilities
- Developed a staking platform for liquidity providers and ODDZ token holders to get maximum yield in ODDZ token along with platform fee discount.
- Implemented gasless transactions using OpenZeppelin Defender and Biconomy relayers improving user experience.
- Developed an automation framework for expiring the options, distributing staking reward, auto-adjusting the pool risks leveraging Openzeppelin, Chainlink Keepers, and Gelato network, creating a self-executing DeFi ecosystem

#### Rakuten

Data Engineer

Bangalore, India

Oct '20 - Jan '21

- Architected Datalake for Rakuten telecom department for data scientists to develop intelligent models.
- Research big data technologies for building Datalake to handle petabytes of data using MinIO and YugaByte.
- Collaborated with various teams to ingest various kinds of data into data lake.

#### OpenText

Senior Software Engineer

Bangalore, India

Jul '18 - Sept '20

- Developed REST services using Web API.
- Developed web applications using .Net MVC , javascript and jquery.
- Writing efficient code adhering to industry standards and participating in code reviews.
- Expertise in TypeScript and developing services, custom directives in angular.

#### Tata Consultancy Services

Software Engineer

Bangalore, India

May '15 - Jun '18

- Worked as C#.Net developer in developing web applications for various customers.
- Worked on .Net MVC Framework and used various web technologies like HTML, CSS, JavaScript, jQuery for developing a web application.

### SKILLS & INTERESTS

---

- **Programming Languages:** Typescript, [Node.js](#), Solidity, Rust, Move
- **Smart contract development:** ERC 3643, 4337, 4626, 8004, 8183, 20, 721,1155, Hardhat, Foundry, Anchor
- **Backend stack:** AWS, MongoDB, Postgres, MySQL
- **Core skills:** Backend Engineering, smart contract development, smart contract security

### EDUCATION

---

#### SASTRA University

Bachelor of Technology in Computer Science and Engineering

Thanjavur, India

May '15
